Document Tags

A PwC Product

PwC's solution for efficient document management in Workday

Your benefits at a glance

All data and features remain in one system

HR departments can save time, meet deadlines and easily check documents for completeness

Reduce cost and effort by 40-70% in comparison to similar solutions, as no additional custom integrations need to be created

Improved reporting functions through additional detailed information from the documents

PwC's Document Tags solution extends the document management capabilities in Workday. Your HR department can **efficiently** manage and edit documents as well as automate workflows within Workday's functionality – without buying an external solution.

- Documents uploaded as part of an HR business process can be tagged with additional information.

- With our powerful rule sets, we provide you with "Simple Rules" that you can activate with just a click to tag your documents after they have been uploaded to the system.

- Thanks to additional document purge checkups as well as completeness checks of profiles, compliance requirements is always met.

Get the most out of your documents with our document management solution! Contact us.
