

# Smart Business Insight Suite

A PwC Product

Transparency and control over your processes, information and risks

## Your challenges

As a finance and/or tax department, how do I keep track of the state and responsibilities within the global processes, controls, risks and compliance obligations?

How can I collect financial and “tax-related” information from my organisation in a structured and efficient way in order to determine actions based on it?

How can I identify my financial and “tax-related” risks, track changes on an ongoing basis and initiate countermeasures?

## Our solution

The **PwC Smart Business Insight Suite** enables executives to meet ever-changing regulatory requirements with technological solutions.

- Monitor your global compliance processes in a **management dashboard** and manage the **entire compliance cycle in real time**.
- Gather important management information from your organisation with the help of **questionnaires** and keep track of your process-relevant documents with the suite’s flexible **document section**.
- Capture your **risks**, link processes and **controls**, and track the **risk progression**.

Reshape your global process management! We are pleased to advise you.
