

Property Tax App

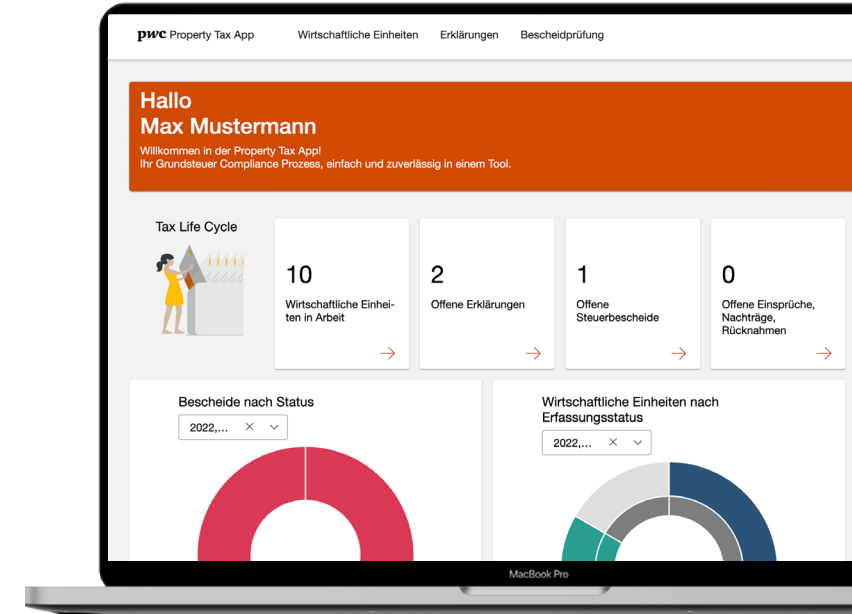

Property tax made easy

Would you like to digitally map the entire life cycle of your property units?

Digitise your high-volume data with our user-friendly and intuitive digital solution Property Tax App:

- ✓ Automated data import instead of manual typing of property-specific and tax-relevant data.
- ✓ Selection of suggested standard ground values – in one go instead of laboriously searching in the various portals.
- ✓ Simple preparation of the property tax return based on the validations.
- ✓ Reliable and electronic transmission of appeals with one click.
- ✓ Possibility of adhering to the 4-eyes principle in all four modules for your internal processes.

Depending on your needs, we offer you two different service offerings: Managed Service and Software-as-a-Service.

Module 1: Data management and revaluation

Manage all relevant information in a powerful database. Benefit from simple data migration from existing systems.

Module 2: Declaration

Maximum work simplification through intelligent workflow management to send your property tax declarations securely and electronically to the responsible tax authorities.

Module 3: Review of assessments

Use an automated assessment review with information on deviations from the declaration and integrated deadline management as well as the automatic splitting of collective assessments.

Module 4: Appeals

Use the electronic transmission of appeals to the tax authorities. Keep track of your communication history thanks to our user-friendly visualisation.

Manage the property tax compliance process – intuitively and digitised end-to-end.
