# Property Tax App
Property tax made easy

Would you like to digitally map the entire life cycle of your property units?

Digitise your high-volume data with our user-friendly and intuitive digital solution Property Tax App:

- Automated data import instead of manual typing of property-specific and tax-relevant data
- Selection of suggested standard ground values – in one go instead of laboriously searching in the various portals
- Simple preparation of the property tax return based on the validations
- Reliable and electronic transmission of appeals with one click
- Automatic extraction of payment information using GenAI
- Export of payment information in a CSV file for use in efficient payment processing within your company
- Keep track of due dates – no more late fees
- Possibility of adhering to the 4-eyes principle in all four modules for your internal processes

Module 1	Module 2	Module 3	Module 4	Module 5
Data management and revaluation	**Declaration**	**Assessments**	**Appeals**	**Payments**
Manage all relevant information in a powerful database. Benefit from simple data migration from existing systems.	Maximum work simplification through intelligent workflow management to send your property tax declarations securely and electronically to the responsible tax authorities.	Use an automated assessment review with information on deviations from the declaration and integrated deadline management as well as the automatic splitting of collective assessments.	Use the electronic transmission of appeals to the tax authorities. Keep track of your communication history thanks to our user-friendly visualisation.	Maximum time savings through automatic extraction and export of your payment information as a CSV file. Display of your payment terms in the processing workflow for a comprehensive overview of your business units.

Manage the property tax compliance process – intuitively and digitised end-to-end.
